PRODUCT GUIDANCE SHEET

ARPAX A10

CONCENTRATED DAILY TOILET CLEANER

A daily use toilet and urinal cleaner/descaler which dilutes to produce a viscous liquid which clings to sanitary ware surfaces to improve cleaning action. Pleasantly fragranced to safely and effectively clean stainless steel and ceramic toilets. To aid product recognition the ARPAX A10 product label and the label on the flip-top bottle are a red.

Product Name:	ARPAX A10	ARPAX A10 500ML BOTTLES
Description:	Concentrated daily use toilet cleaner	Arpax A10 labelled flip-top bottles
Pack Size(s):	2x2Lt	1x6
Pallet Size(s):	160	NR
Product Code(s):	1789000	1790000

HOW TO USE

Daily Toilet Cleaner Concentrate is dispensed as a controlled dose into a labelled bottle fitted with a directional cap to allow maximum economy in use over conventional ready to use toilet cleaners. Suitable for daily washroom cleaning of toilets, urinals and other sanitary ware.

Step 1: Before use, flush toilet to remove all debris and allow the water to settle. Using a toilet brush, force some of the water in the bowl around the U-bend by digging the brush up and down in the water. This will allow the product contact time with any mineral salts/scale at the water level.

Step 2: Direct the product up under the rim and allow it to run down the inside of the toilet bowl. Leave for 2-3 minutes. Complete the remainder of the surrounding area cleaning tasks. Finally, scrub the toilet bowl with a toilet brush to remove any stubborn scale or soiling and flush toilet with brush in water to remove any product left in pan or on the brush.

Arpax A10 should be applied to toilets at the same time as you pre-spray the other surfaces to be cleaned in the toilet area. Allow suitable contact time to descale heavily soiled toilets.

Caution: Never use this product in conjunction with a chlorine based product. It will produce chlorine gases which can be fatal if inhaled.

ARPAX A10 must be diluted before use using an Arpax bottle fill dispenser. For a bottle cleaning solution dilute with two plunges of dispenser per red labelled Arpax A10 bottle with a directional nozzle and fill with water or via an automatic chemical/water mixing station.

Bottle Fill Instructions:

1. Unscrew flip-top cap from bottle and fill with water to the top of the label.
2. Insert bottle neck on to the dispensing nozzle and push upwards – priming the unit.
3. Position bottle on the base of the drip tray to allow vending to commence.
4. PULL lever towards you in an upward direction until it CLICKS. This is now ready to vend.
5. To vend product PUSH lever downwards. The concentrate will be dispensed into the bottle at the correct dilution to water.
6. Remove the bottle from the base and screw flip-top cap onto the bottle. Turn bottle upside down to ensure thorough mixing has occurred.
7. WAIT for the green indicator to reappear in the window before inserting the next bottle for vending.

SAFETY ADVICE – WHEN HANDLING or DISPENSING THE CONCENTRATE

DANGER Flammable liquid and vapour. Causes severe skin burns and eye damage. Very toxic to aquatic life. Toxic to aquatic life with long lasting effects. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Wear protective gloves/ eye protection/ face protection. FOR PROFESSIONAL USE ONLY

SAFETY ADVICE – WHEN USING THE DILUTED SOLUTION

Wearing eye protection is recommended when dispensing concentrate into bottle, but generally not needed for normal use of the cleaning solution. Wear suitable gloves. Avoid contact with eyes and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention. Keep out of reach of children.

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice.
