PRODUCT GUIDANCE SHEET

CENTENARY ALCOHOL HAND GEL

ALCOHOL HAND SANITISER

A fast acting alcohol hand gel. When used following washing with a mild, odourless hand soap, helps keep hands germ-free in busy commercial premises. Ideal for retail catering, residential healthcare, hospitals, schools, hotels, leisure resorts, washrooms and busy public areas.

Product Name:	CENTENARY ALCOHOL HAND GEL POUCH
Description:	Ready to use alcohol hand sanitiser
Pack Size(s):	6X800ml
Pallet Size(s):	60
Product Code(s):	3052000

HOW TO USE

Insert the alcohol gel pouch into the bespoke dispenser. Pressing the button on the dispenser releases a small amount into the palm of the hand.

Rub the disinfectant gel into hands especially in between your fingers and finger nails properly. Allow to air dry.

Do not rewash hands immediately after applying alcohol gel. Always wash and disinfect hands following handling raw food, refuse or visiting the toilet.

Good personal hygiene standards are a critical area of cleaning and disinfection within the kitchen. Most food poisoning outbreaks occur not because of infected produce or poor temperature controls, but due to poor personal hygiene by food handlers.

Keep Dispensers Hygienically Clean:

As a frequently touched piece of equipment, care should be taken to ensure that the soap dispensers are kept hygienically clean and that residues of soap are periodically wiped from surrounds of the dispenser and the vending nozzle.

SAFETY ADVICE

WARNING Flammable liquid and vapour. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

For further detailed information on this product please refer to the Safety Data Sheet.

FOR PROFESSIONAL USE ONLY

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice.
