

PRODUCT GUIDANCE SHEET

GOLD AQUALINE

CONCENTRATED BEER & JUICE LINE CLEANER

A powerful and highly effective liquid beer and juice line cleaner. Blue in colour and non-chlorinated, this beer line cleaning liquid contains a heavy duty blend of alkalis and non-foaming detergents, which rapidly break down yeasts, sugars and other beer/juice/wine line residues.

Product Name:	GOLD AQUALINE
Description:	Concentrated beer and juice line cleaner with colour indicator
Pack Size(s):	2x5lt
Pallet Size(s):	80
Product Code(s):	1403000

HOW TO USE

This is a highly concentrated product and it must be diluted with water before use. It is normally dispensed using a 30ml pelican dispensing pump fitted to the 5lt container. Due to the volume required it should be dispensed from the container with extreme care. It can also be pumped automatically through an automated beer line cleaning system.

- Shut off CO2 to the beer kegs and connect to the cleaning system - this is usually a plastic cleaning vessel. Flush the lines with clean water to remove any loose debris before cleaning.
- Make up the cleaning solution – we recommend an 80:1 dilution ratio with water (approximately 12mls per litre of water, or 250mls in a 20lt cleaning container).
- A stronger solution may be needed depending on the type of beers being served and how often the lines are cleaned.

- Draw the chemical/water cleaning solution into the system until a blue colour is visible at the pumps and leave in the lines for approximately 20 minutes contact time.
- Then draw off one pint glass of solution from each line and leave for a further 20 minutes.
- Finally, draw off all the remaining solution and thoroughly flush with clean cold water.
- Continue flushing until the blue indicator of the solution is no longer visible from any of the lines. Finally reconnect the beer kegs and pull beer as normal.

SAFETY ADVICE

DANGER May be corrosive to metals. Causes severe skin burns and eye damage. Harmful to aquatic life with long lasting effects. Avoid release to the environment. Wear protective gloves/ eye protection/ face protection. **IF ON SKIN (or hair):** Take off immediately all contaminated clothing. Rinse skin with water or shower. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor.

FOR PROFESSIONAL USE ONLY

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice.
