

The Plastico Closed Loop Programme is the UK's only cold cup distribution, collection and recycling service. The scheme is a joint venture between Plastico, the UK's market leader in PP cups manufacturing; Closed Loop Environmental Solutions, who are responsible for the collection and re-processing of used PP cups (and are the people behind Simply Cups); and Kidd, your local Plastico specialist distributor.

## Programme Benefits

- All cold cups purchased within the Plastico Closed Loop Programme can be collected, the material recycled & reused, and made into useful items for specific customer requirements. See overleaf for examples of products made from recycled cups!
- By recycling all of your cold cups with our programme, none will end up in landfill. This is great for both you and the environment! Sites will be able to reduce their costs of disposing via landfill which incurs gate fees & tax rates.

## How the Scheme Works

## Target Markets

- Large scale closed events, where disposable cold cups are used and the waste stream can be controlled
- Music venues, festivals
- Sport arenas & stadia
- Local Authority Event
- University Campus

**Getting your end user involved in the process!**

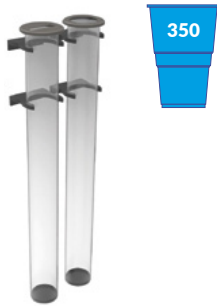

This cold cup recycling bin is an example of a product made from recycled plastics.

Its clever design maximises space usage, and contains a reservoir where leftover liquids can be disposed of.

## What Products Can be Made from Cups?

### Cup Tube Bins

Wall Mounted 2 Tube Cups & Lids

Wall Mounted 3 Tube Cups, Lids & Liquid

Free Standing 2 Tube Cups & Lids

Free Standing 3 Tube Cups, Lids & Liquid

### Tables & Benches

# HAHN

PLASTICS

Hahn Plastics is a leader in the development and manufacture of outdoor, technical recycled plastic products. For over 20 years, the company has been developing innovative and long-lasting products using state of the art technology and moulding tools, along with technical and engineering expertise. The company has developed several patent-protected preparation and manufacturing processes that are incorporated into the manufacture of its hanit© range of recycled plastic products. As well as being 100% recyclable, hanit© products have extraordinary technical and economical properties, making them both durable and highly competitive.
